

PRESENTS...

The BootScootin Add-on!

It's here!

You may or may not know... that I've done a little bit of research on Firefox add-ons. I own the site [AllAboutAddons](http://AllAboutAddons.com), which gives you valuable information about these add-ons, and how they affect you as an Internet Marketer.

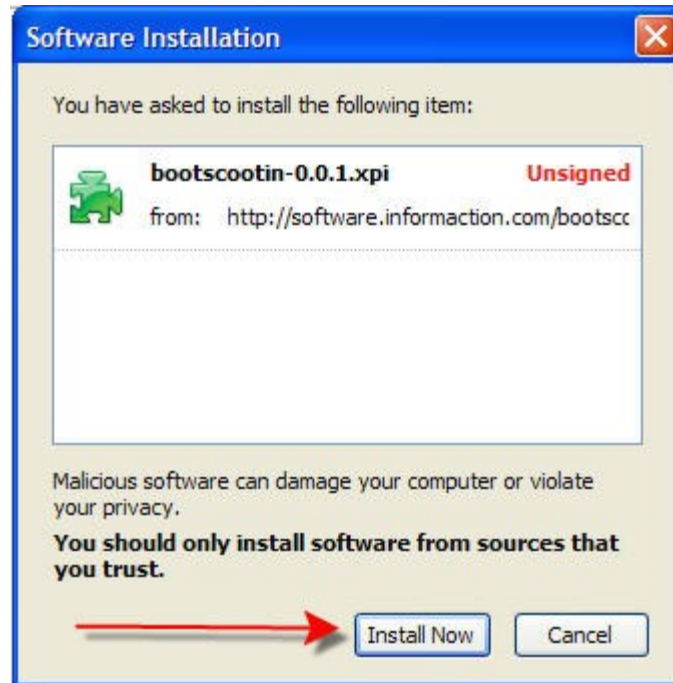

So, it's right that BootScootinTraffic now has a Firefox Add-on... that will alert you while you're surfing! You'll be the first to know about contests, BootScootin Marathons, and promotions!

It's created by [Giorgio Maone](#), the developer of NoScript for Firefox.

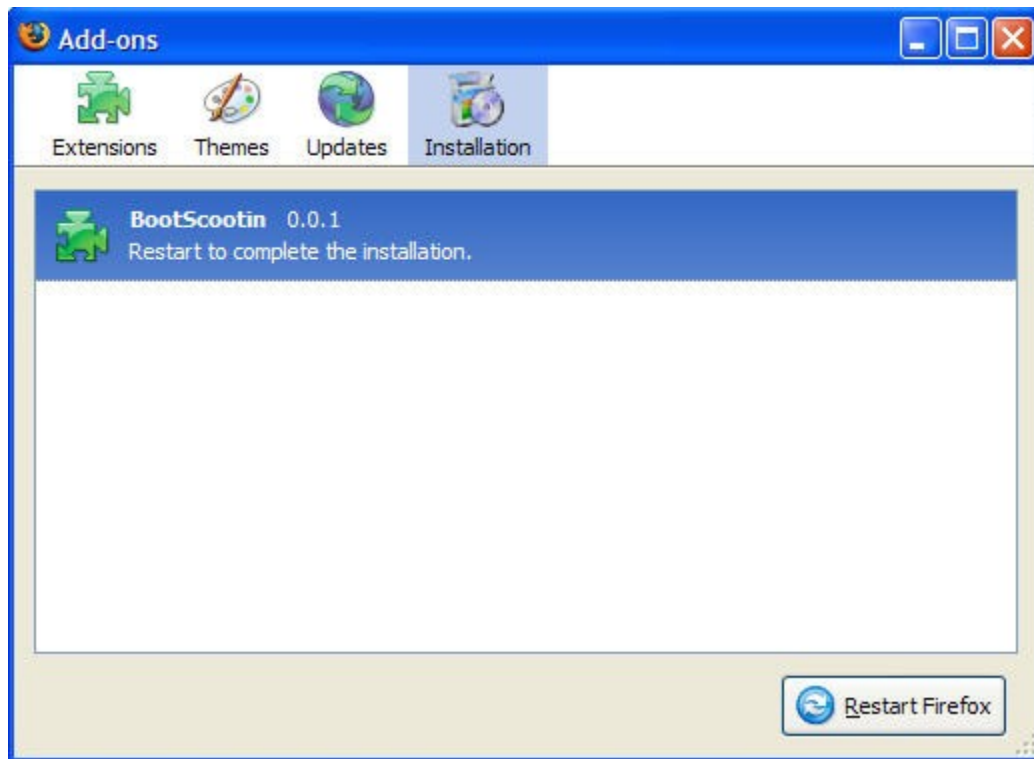

SO... to get this awesome add-on, here's whatcha do.

Download the BootScootin Add-on here.

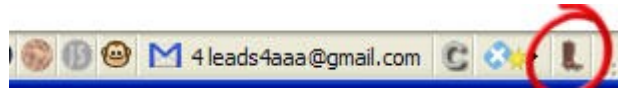

<http://www.bootscootintraffic.com/SaysYayTo/BSTAddon/>

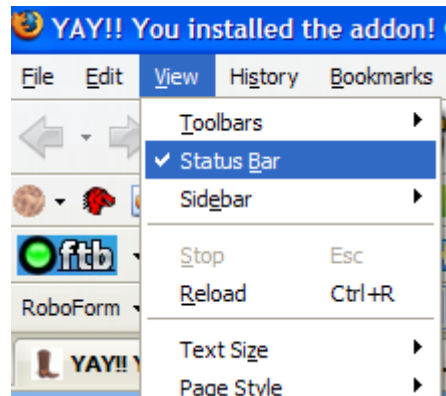

Click the "Install Now" button.

Once it installs, click the "Restart Firefox" button.

You'll see an icon flashing on the far right hand side of the statusbar, at the bottom of your browser. Don't see the status bar?

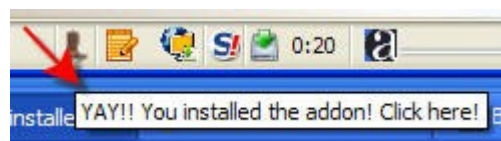

Then go to "View" and click "Status Bar" in the drop down menu!

Okay... you'll see that the BootScootin Icon is flashing between a boot, and a picture of the Great State of Texas.

When it's flashing like this... its letting you know that our "Promotions" page has changed! Hover over the icon for a message.

Then... click on the icon, and you'll be taken to the Promotions page.

BOOTSCOOTIN
Traffic.com

Ain't it great?

Win a free referral today!
5 lucky winners from both BootScootinTraffic
and [HelpHits](#) will win a free referral
for just surfing 100 pages at each
Exchange! Yay!

Good Luck!

[Log in now!](#)

The Boot picture  will continue to sit on your statusbar... and it will check every 30 minutes for changes to the promotions page!

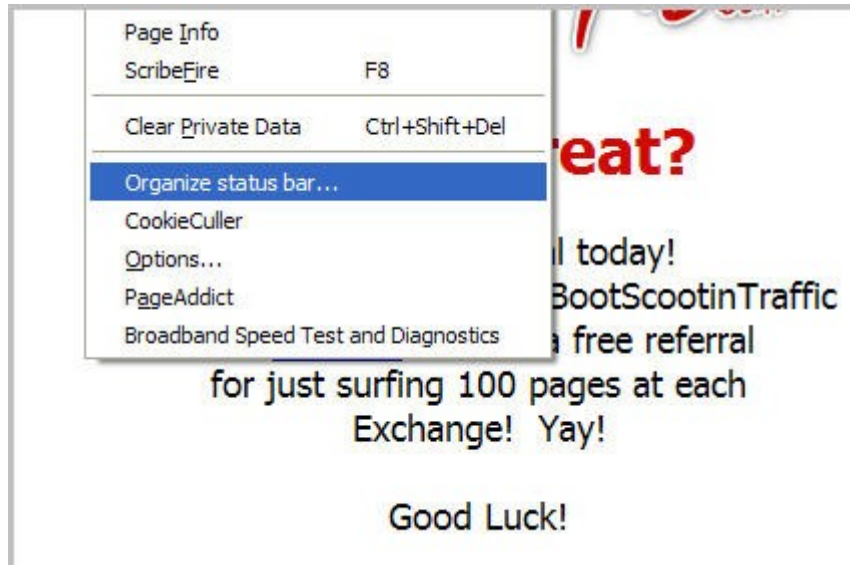

You can click the icon at any time, to log in to your BootScootinTraffic account, and start surfing!

I know the icon is waaaay over there on the right... but there IS an add-on you can get that you can use to rearrange the icons on your statusbar.

It's called Organize Status Bar, and you can get that here:

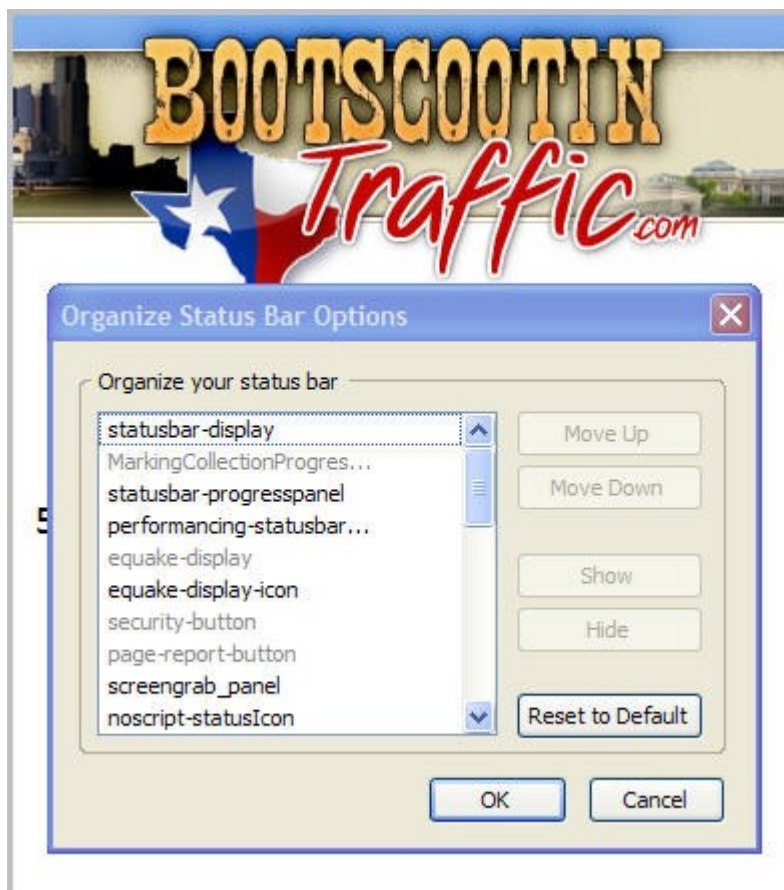

<https://addons.mozilla.org/en-US/firefox/addon/1759>

After you install it, like we did in the above instructions, you open it like so:

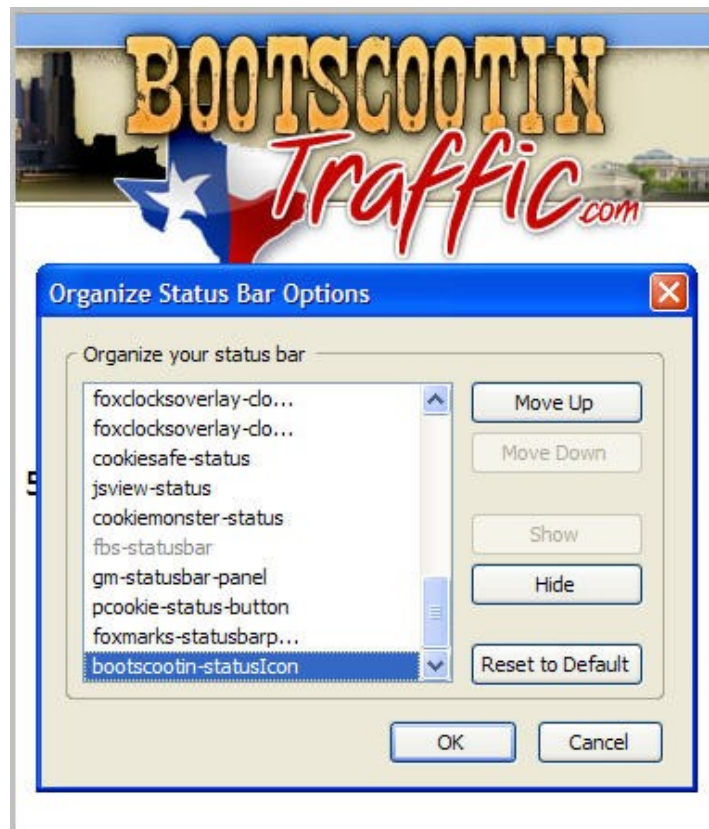

From the “Tools” menu at the top of your browser, select “Organize Status Bar”.

A window will pop up

This lists everything you have installed on your statusbar. Scroll down and choose “bootscootin - statusIcon” from the list.

When you select “bootscootin-statusIcon”, the “Move up” button will appear, and you can choose the location of your icon. While you do this, your status bar will look kinda funny...

BUT... as you move the Bootscootin icon up in the list, you'll be able to see it move as you click.

When you decide where you want the icon, click "OK" in the window.

Now, it's toward the middle of the statusbar, and easier to see!

Please let me know if you have any questions, you can reach me when you click "Contact Us" at <http://www.bootscootintraffic.com/help/>

Sunny Suggs! Yay!
